

Station08: Geneva

Temperature assignment dataset

Station information

Station: Geneva

Country: Switzerland

Latitude: 46.200

Longitude: 6.150

Elevation: 405.0 m

Dataset information

Observation period: 1753–2013

Number of annual observations: 226

Variable: annual mean temperature

Unit: degrees Celsius

Annual mean requirement: at least 10 valid monthly observations

File contents

Year: calendar year

Temperature: annual mean temperature in degrees Celsius

Source and use

Data source:

NOAA National Centers for Environmental Information, Global Historical

Climatology Network Monthly Temperature Version 4 (QCF adjusted series).
